

It's Time for Intelligent Mail[®]: Bringing It All Together

Presented by:

Richard Lander
PostcardMania

Electronic Documentation

- Postage statement and supporting documentation required for mailings
- Hard copy postage statements can be replaced by secure, electronic submission which can bring added mailing functionalities
- Full-Service option requires one of three electronic documentation methods through *PostalOne!*[®]

1. Postal Wizard

2. Mail.dat

3. Mail.XML

Agenda

- Introduction to Full Service
- **Electronic Documentation**
 - Methods
 - Functionalities
- Bringing It All Together
- Resources

PostalOne!®

PostalOne!

Manage your mailing experience electronically, all in one place.

The *PostalOne!* system offers a Web-based alternative to existing manual mailing processes with an electronic suite of services designed exclusively for business mailers. It is an information management system that sets the foundation for a seamless acceptance mailing process. The system provides an electronic linkage between a customer's mailing information and Postal Service business mail acceptance and induction processes. This collaboration will give customers a streamlined process for mail entry, payment, tracking and reporting.

Existing Customers
Log on to your *PostalOne!* account. [Log On >](#)

New Customers
Apply for a *PostalOne!* account. [Learn More >](#)

Features & Benefits

- Provides electronic information submission capabilities to any size mailer
- Streamlines the mail acceptance process
- Automates postage payment processing
- Enables mail job visibility and access to mailing information
- Enables automated scheduling of mail entry
- Enhances account management

Program Participation
There are three methods that allow you to submit postage statements electronically:

- Postage Statement Wizard®
- Mail.dat®
- Web Services

[Learn More >](#)

<http://www.usps.com/postalone/>

- *PostalOne!* is an online system that takes input from the mail preparer and creates postage statements and supporting documentation
- Documentation created for:
 - Business mail verification
 - Acceptance
 - Induction processes

Agenda

- Introduction to Full Service
- Electronic Documentation

– **Methods**

– Functionalities

- Bringing It All Together
- Resources

Methods of Electronic Documentation

- The requirements for electronic documentation are based on the **number of pieces in the mailing** being inducted

*Mailings that require a
Postage Statement
only*

1. Postal Wizard
2. Mail.XML
3. Mail.dat

Or

*Mailings that require
Postage Statements
and Supporting
Documentation*

1. Mail.dat
2. Mail.XML

What is Postal Wizard?

- Submit postage statements securely online to USPS through *PostalOne!*[®] account
- Key in information online or upload
- Can be used only when Qualification reports are not required

Postal Wizard: Mailer/Mailing Profile

- For mailings that only require a postage statement and no supporting documentation
- When mailers separate pieces of identical weight permit imprint mail by price category, or when the correct postage is affixed to each piece in full-service mailings
- Mailings less than 10,000 pieces
- Intended for mailers who generally
 - Write or type postage statements
 - Do not use software to generate statements

Postal Wizard: Benefits

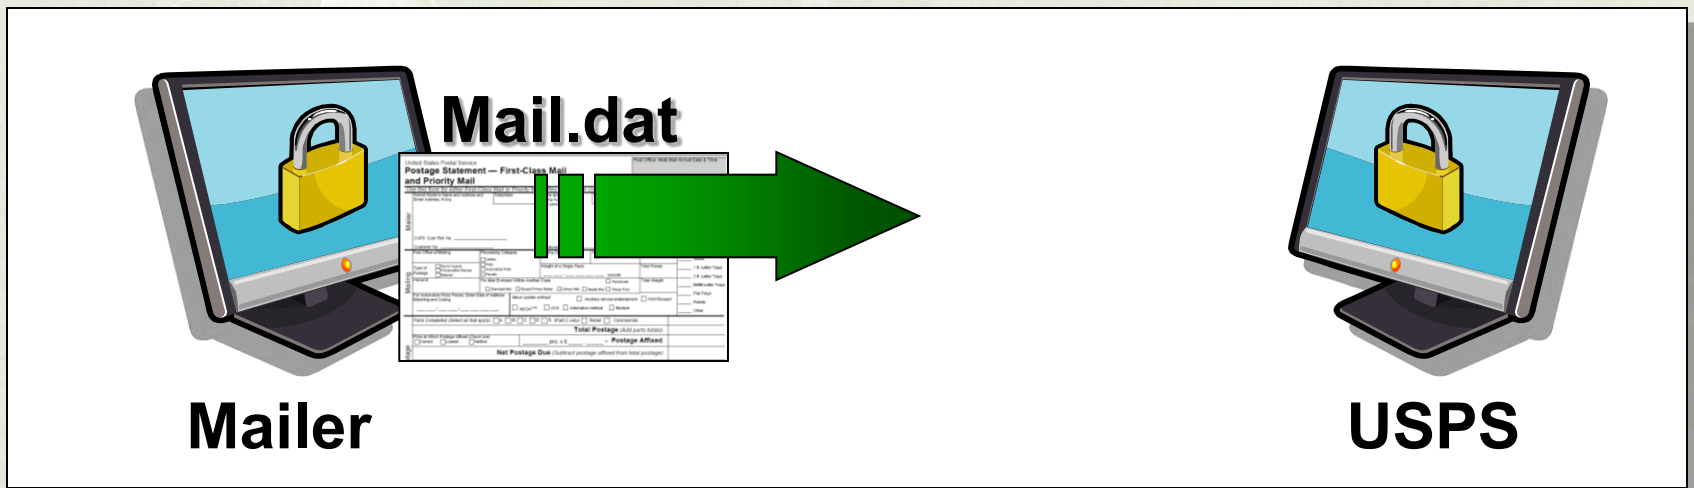

- ✔ Automatic price calculations
- ✔ 24/7 access to payment information
- ✔ Streamlined acceptance process

What is Mail.dat?

- Relational file structure transmitted from mailer to USPS for each mailing
- Provides full description of a mailing job and related data including the nesting relationship of the mailing

Mail.dat: Mailer/Mailing Profile

- For mailings of any size
- Intended for mailers who generally
 - Use software to generate statements
 - Have need to send large, complex mailings

— First Register!

Mail.dat: A Closer Look

- Example for constructing a Mail.dat transmittal for standard piece to tray to container nesting

Information about Pieces

Information about Trays and pieces

Information about the Containers and pieces and trays

Mail.dat: Spring Release

- The Mail.dat 09-1 release, supports the following enhancements:
 - Identify Basic and Full-Service pieces
 - Copalletization
 - Spoilage and shortage-related adjustments
 - “By/For” relationship

Utilizing Mail.dat: Key Steps

1 Generate Mail.dat files using presort mailing software

2 Transmit files to *PostalOne!*®

3 Present mailing to USPS for verification and delivery

Upon receipt, the Postal Service will extract the data needed for verification and acceptance.

Mail.dat: Benefits

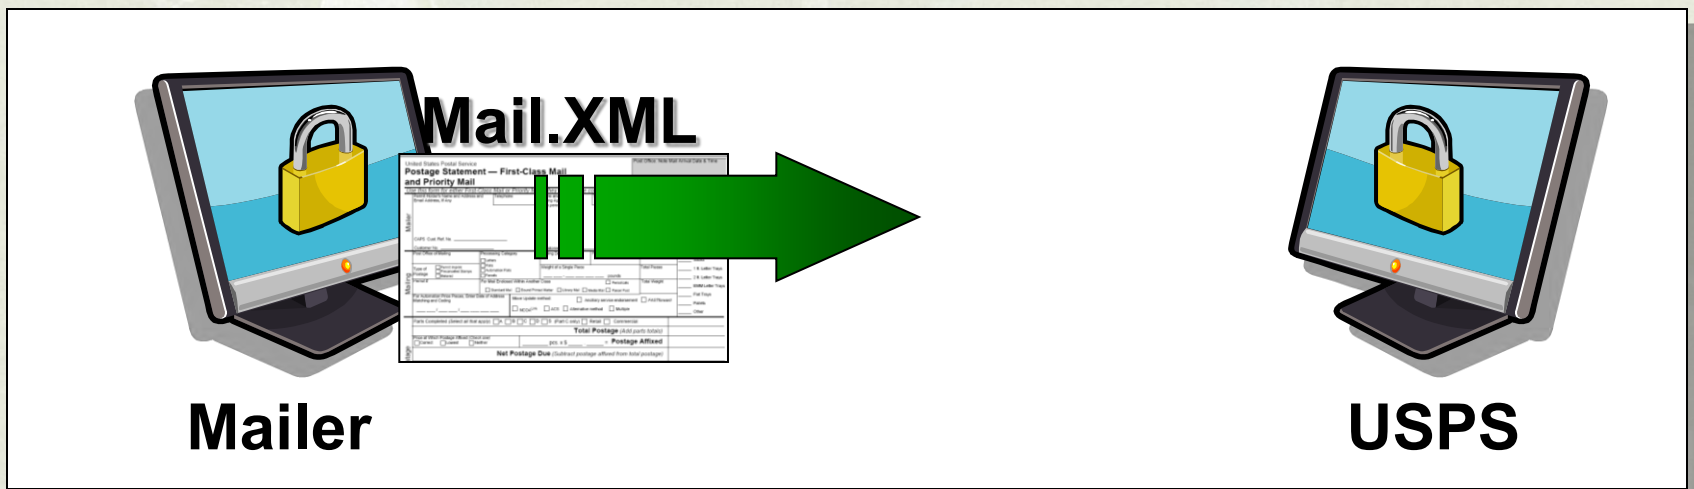

-  Streamlined high volume mail preparation
-  Multiple accounts management
-  Complex mailing scenarios management
-  Automatic price calculations
-  24/7 access to payment information
-  Streamlined acceptance process

What is Mail.XML?

- Electronic documentation submitted securely to *PostalOne!*[®] through Web Services
- eXtensible Markup Language
- Similar capabilities and benefits as Mail.dat

Mail.XML: Spring Release

- Mail.XML version 4.1 for Web Services supports:
 - Identify Basic and Full-Service pieces
 - Copalletization
 - Spoilage and shortage-related adjustments
 - “By/For” relationship

Agenda

- Introduction to Full Service
- Electronic Documentation

- Methods

- **Functionalities**

- Bringing It All Together
- Resources

Electronic Documentation Functionalities

- For Mail.dat and Mail.XML users, electronic documentation can provide additional functionalities
 - Mixed Mailing
 - Copalletization
 - Spoilage and Shortage

Mail.dat and Mail.XML offer mailers added flexibility

Mixed Mailing

- What is a Mixed Mailing?
 - Contains mail satisfying the Basic Option (or mail with a POSTNET) AND mail that qualifies for the Full-Service Option
- Mailpiece record required for each POSTNET and Basic Option mailpiece
- Requires unique tray and container barcodes

Comailings use multiple permits within a single mailing while **Combined Mailings** allow for different postage methods in a single mailing

Copalletization

- What is Copalletization?
 - Copalletization allows for “leftover” bundles or trays to be consolidated
- Part of mailing stays at the origin facility and part of it goes to a consolidator
- Ability to track mailpieces remains!

Spoilage and Shortage

- What is Spoilage?
 - Spoilage occurs when electronic documentation accounts for pieces spoiled during production
- What is Shortage?
 - Shortage occurs when partial container, pallet, or handling unit exists
- USPS will adjust yet-to-be finalized postage statements accordingly

If the postage statement has already been finalized, then a refund request is needed to complete the adjustment

Intelligent Mail Barcode Encoding

- Created by downloading and installing the encoder and font
 - The encoder converts the 20-digit tracking code and routing code, a maximum of 11-digit into a combined 65-character string representing the ADFT characters.
 - A special font is required to convert 65 ADFT character string into the IMb.
- Height-modulated barcode and uses 4-state symbology: Full bar, Ascender, Tracker, and Descender

IMb™ example: 0070012345620080000198765432101

DADTATFFAFFTTTAFTAFDADFDDDDTAFFDAAFFDAFDDFFFTADFTFTTFDAAFTFTADTTT

Available Encoders

Operating System	Language and Applications Supported*					
	C	Java 2	COBOL	PL/1	MS Access	MS Excel
MVS, z/OS, and OS/390	Yes	Yes	Yes	Yes		
VSE/ESA	Yes		Yes	Yes		
OS/400	Yes	Yes	Yes			
AIX	Yes	Yes				
Linux	Yes	Yes				
Solaris	Yes	Yes				
HP/UX	Yes	Yes				
Mac OS X	Yes	Yes				
Programmer Version for Windows	Yes	Yes				
MS Office Version for Windows					Yes	Yes

* Support for 64-bit Windows, Linux, and Solaris as well as for Assembler on MVS/VSE

Generate the Barcode

- There are three steps required to generate the Intelligent Mail® barcode on letters & flats:
 1. Form the 31-digit payload
 2. Encode the 31-digits
 3. Print the barcode on mailpieces

Form the 31-digit Payload

➤ Gather and assemble data to form the 31-digit

Step 1 Payload

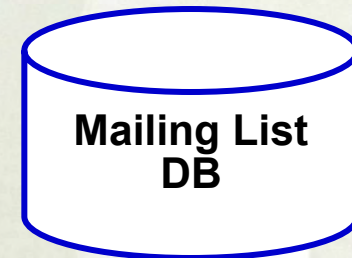

5070012345620080000138141834649

Barcode ID	Service Type	Mailer ID	Serial Number	Routing Code
<i>Ex. 50</i>	<i>Ex. 700 for</i>	<i>Ex. 123456</i>	<i>Ex: 200800001</i>	<i>Ex. 38141834649</i>
<i>for Mixed AADC</i>	<i>First-Class Mail</i>	<i>USPS-assigned</i>	<i>Mailer-assigned</i>	<i>Delivery Point ZIP</i>

Apply Encoding Algorithm

Print Intelligent Mail® Barcode

Basic online decoder tool is available at:

<http://ribbs.usps.com/OneCodeSolution>

Intelligent Mail® Barcode

You have reached the Intelligent Mail® barcode decoder page. Using this tool you can convert a Intelligent Mail® barcode into its numeric equivalent. First, convert each bar of the Intelligent Mail® barcode into its character equivalent (F, T, A, or D) as described in the legend below. Then type the character string into the barcode character field. Finally, click on the [Decode] button.

Barcode Character (enter a string of sixty five F, D, A, or T characters):

ADTTTATTTFTDFADTDTFTAATATADDDDFTTDTDFDFTTATAFFDDADDFFADDFDFTTTAD

Bringing It All Together

With Full-Service Option your business can improve...

- ✓ Supply Chain Effectiveness
- ✓ Accountability
- ✓ Mailing Return on Investment

Bringing It All Together

Supply Chain Effectiveness

- Information flow
 - Near real-time
 - Demand forecasting
- Reduce costs with handling, storage of paper
- Sustainability

Bringing It All Together

Accountability

- Proof of Mailing
- Specific Induction Information
- Communication across suppliers

The Future of the Mail

- Using Intelligent Mail[®], your business will have the information and resources to succeed
- With Intelligent Mail[®], the future is now...
